From the Desk of the Editor- in -Chief

Dear Colleagues,

The Fifth issue of the “*Journal of Crop and Applied Sciences*” published under the aegis of “Society for Nature and Applied Sciences”. The help rendered by editorial board members is well appreciated. We thank the society executive and advisory members, reviewers, all authors and the secretary office for their support rendered towards this journal' timely publication.

The journal aims to meet the needs for continuing crop and applied sciences research by members of national and international communities and to publish articles of scientific excellence.

We are also sure that our journal will provide top-quality original papers and articles, case reports and letters to the editor that will continue to help everyone interested in publishing quality research findings under one roof. We, again, hope that the journal will continue to be an important conduit for scientific knowledge dissemination on a very broad international level.
